

PROTECTING OUR MOST VALUABLE ASSET

With all the data about sickness and high absenteeism in our schools, solutions to stop the spread of disease are critical and urgent. Facility Health's disinfectant application is the first step in controlling the spread of harmful bacteria. This preventative application is crucial for all student areas, including classrooms, gymnasiums, locker rooms, cafeterias—even school buses and playground equipment.

NEWS HEADLINES:

“Swine flu prompts hundreds of schools to close”

“Sickness prompts closure of Alcoa schools”

“H1N1 prompts closure of hundreds of schools”

Take a proactive approach to keep our children healthy and safe by reducing the spread of health-threatening pathogens with Facility Health™ products.

FH-1 ELECTROSTATIC SPRAYER

- Electrostatic spraying = better coverage
- More efficient than the old “spray and wipe” technique
- Use less chemical and still get better results
- Disinfect a classroom more efficiently in minutes
- Easy to use
- Holds enough chemical for over an hour of spray time
- Durable, industrial sprayer (standard 110v)

ECO-FRIENDLY
