VIEWPath®

Video Interactive Education Window

Powered by **SAFARI Montage™**

VIEWPath is a fully integrated video and audio solution for use in educational environments including classrooms, libraries, cafeterias, administrative offices - virtually any location where teaching and learning take place. The integration of SAFARI Montage and The SAFE System, allow schools and districts to provide a comprehensive suite of safety, security and teaching tools. ViewPath is available for teachers, students, administrators, and parents with appropriate access.

E-Rate is the largest source of technology funding for K-12 schools in the United States. The Schools and Libraries Program of the Universal Service fund makes discounts available to eligible schools and libraries for telecommunications services, Internet access and internal connections. The majority of SAFARI Montage products have been validated by the Universal Services Administrative Company (USAC) and are E-Rate eligible. ViewPath products are classified as Internal Connections. ViewPath has several E-Rate eligible components, including:

- Pathways SM
- Selective Video Streaming
- WAN Servers

Administrators

Working with teachers to view classroom lessons without disruption

VIEWPath allows administrators and teachers to work together to schedule observation of classroom lessons for purposes of teacher evaluation, student behavioral issues, professional development, etc. Viewing only takes place with teacher permissions according to a predetermined schedule. Rather than disrupting a classroom with a physical intrusion, remote viewing allows principals and coaches to see a more natural classroom interaction.

Examples:

- Teacher evaluation
- Student behavioral issues
- Student-teacher evaluations
- Teacher re-certification
- Professional development

Teachers

Unparalleled capabilities to record and view classroom activities

VIEWPath allows teachers to record their own classroom lessons to share with colleagues, self-evaluation, documentation of best practices, mentoring, and for re-certifications purposes. Recordings of specific lessons are also available for future use in case of teacher absence. Record lectures, science experiments and special guests, etc. **Teachers can produce their own online library, build content development, and create learning objects.** All recordings can be saved, edited, and meta-tagged for sharing and reviewing.

Examples:

- Lectures / guest speakers
- Science experiments
- Best practices
- Mentoring
- Self-evaluation
- Teacher re-certification

Home Access & Students

Classroom recordings can be accessed from home by authorized users

VIEWPath permits authorized users (parents, students, teachers, administrators) to access recorded content from home. Content access is based on user permissions. Teachers can prepare their lessons ahead of time by gathering all of the digital content needed including videos, quizzes, etc. Parents can view a teacher's lesson to help their child. Working and traveling parents can also benefit by watching their child's performance from home.

Students can view lessons from the day to assist with their homework. Recordings of student performance and presentations can be viewed for student improvement and peer review. These recordings can be used in student portfolios and for yearly progress reports. A homebound student (either for medical or disciplinary reasons) can keep up with their assignments.

Examples:

- Recorded lectures and lessons
- Homebound students
- Parents can be more involved
- Student performances for viewing by students and parents
- Homework with lesson review
- Recordings for student portfolios and yearly progress reports

Security

Save precious minutes in any emergency

VIEWPath integrates **THE SAFE SYSTEM** Security Alert For Education microphone and camera, allowing the teacher to discreetly send an alert, which notifies designated responders. The video and audio stream from the classroom is immediately available for live viewing of the emergency and is simultaneously recorded onto a dedicated network server. Designated first responders with appropriate credentials can view the live stream (on desktop or mobile device) and control the camera in order to evaluate the situation and determine the best course of action. The network cameras can also be used for after-hours security via motion sensors.

VIEWPath facilitates a quick and appropriate response for any emergency situation.

Examples:

- Medical emergencies
- Fights
- Explosive devices
- Custody situations
- Stabbing
- Shootings
- Disgruntled employees or parents

Our agents, employees, subsidiaries, affiliates and parent companies are exempt from liability for any loss, damage, injury or other consequence arising directly or indirectly from the application of our equipment. In the event of misuse or malfunction of The SAFE System or any of its components, our agents, employees, subsidiaries, affiliates and parent companies are exempt from liability for any loss, damage, injury or other consequence arising directly or indirectly therefrom.

Where the Best in Classroom Technologies Merge!

Mobility

VIEWPath may be viewed from many mobile and handheld devices.

VIEWPath does not include mobile and handheld devices.

The mobile and handheld devices shown are the Apple® iPad™, Apple® iPhone™, BlackBerry® Curve™ and Motorola® Droid™. All the product names (copyrights, trademarks and trade names) referred to in this brochure are the property of their parent company.

SMLive Videoconferencing Optional Upgrade

With the SAFARI Montage® Live! interactive videoconferencing system, school districts can enable their educators to connect and collaborate with colleagues and students like never before - easily and affordably.

SMLive features include a variety of control settings plus:

- Record and archive sessions
- Text chat
- View and share files
- Manage participant access

Educational Benefits:

- With SAFARI Montage® Live! districts can save money with virtual field trips, distance learning and professional development.
- Virtual field trips designed by leading national organizations like NASA and Colonial Williamsburg replace costly real field trips, while preserving the essence of the experience for students.
- Interactive videoconferencing at the desktop connects remote students with teachers efficiently and economically.
- Professional Development costs are reduced or eliminated, including stipends, substitutes, teacher overtime, mileage reimbursements, meals and beverages, and location costs, as well as costs associated with duplicating or replacing hard copy professional development programs on VHS and DVD.
